Gentlemen's grooming services are generally single blade clip and cool shave, but with movie themed portraits and James Dean lifestyle choices, these barbershops separate themselves from other traditional shops.

Haircuts are becoming a stylish and refreshing experience. In the case you're looking to kill a few hours or anxiously dive into a cut before the start of your night. These diverse barbershops are providing upscale, classic style techniques that recreate the gentleman's experience; where the mission is to look sharp and feel great.

At The /pot Barbershop, sophistication meets superb service. Customers either walk in or have an appointment, and as soon as you check-in, the grooming experience begins with a complimentary shot of alcohol at the bar. Then a refined hair wash, beside the immense built-in bookshelves, relaxes you, prior to the experience. Inside this barbershop, real street motorcycles and travel bags are staged overhead. The setting imposes an underground location, with skilled barber workstations. The stations evoke a backstage dressing room vibe, filled with vanity lights and an illuminated mirror track. The customer's experience could last up to 40-minutes for a classic haircut. The /pot's services menu includes Edge-Ups, Line-Ups and Royal /haves, however The /pot offers its Executive Package, that is sure to leave you saying God I / Goo
